Hey Neil, here is the project SAP-QAPP. We don't have a specific one for the Page work you are doing, but this does cover sediment sampling.

Also, can you send me a quick blurb about the work you are tasked with for the sit rep? Doesn't have to be long just a couple of bullet points.

Thanks,

Jon

Ben – see attached and email below. R8 adopted this for now, though we expect we'll need to update or amend it based on changing conditions. Contact Natalie Quiet or myself with questions.

Thanks,

Mark

All,

Please find attached the SAP/QAPP for the Gold King Mine Blowout project. Some items to call to your attention:

1. This is a standalone document that does not require cross-referencing to the ER/Removal program generic QAPP
2. As always, the UFP-QAPP format is difficult so we added a 1 page Executive Summary. Goal was to provide you a simple item that could even be pulled out so let us know if you have thoughts on changes/additions to it that would help you interacting with the public, etc.
3. Since a lot of field tasking is in flux, we tried to provide enough information but with flexibility to allow for field tasking changes.
4. Region 8 QA program crosswalk is included as Attachment A.
5. Region 8 Site specific data management plan is included as Attachment B.

I'm attaching the individual Word and Excel files for your use as well as a combined PDF file of the whole thing assembled.

Thanks,

Mark
